

people counters

The capsule, the column and the portable people counter are 3 high quality products from the ShopGuard Designer House. These elegant instruments help store owners in evaluating staffing needs, marketing campaigns, floor plans and much more

ShopGuard's people counters have been designed for counting and registering in and outgoing customers in a retail store. Our counters independently count both incoming and outgoing customers. A pair of people counter consists out of a Transmitter (TX) and a Receiver (RX) and the system operates with infra-red technology. The starter of our counter range is the brand new, battery driven people counter and at the top we offer sophisticated, intelligent - software driven, communication versions using "The ShopGuard Engine" program.

Floor mount people counter column

+ Stand alone version

Suitable for the everyday retail store (boutiques, clothing stores, pharmacies, jewellery stores, etc...).

- + Robust, polished aluminum body.
- + Pedestals can be placed up to 10m apart.
- + Simple to operate.
- + Bi-directional counter.
- + Transmitter and receiver have individual power supplies, no need to connect them to each other.
- + Optional door chime can be connected to the system, giving notice when a customer is entering or exiting the store.
- + Figures on the display are hidden and only visible for authorized personnel.

+ technical specifications

Material:	brushed aluminium
Height:	871 mm
Max diameter:	125 mm
Column diameter:	70 mm
Weight:	1536 g
Psu:	12 VDC
Operation range:	between 2 and 10 meters

+ Intelligent version

This product is offering unique solutions for multi location retail stores, due to the optional data collection, remote accessibility and special data analysis software.

- + Remote and LIVE data query: Monitoring the traffic of multi-location stores from a remote head office, downloading real time data, designing your own reports and comparing daily figures, periods or averages are easy done with this system.
- + Tracking store statistics remotely via your web browser is one of the added features.
- + Data available in .XLS format for importing
- + Different access and commands levels enable secure internal data usage.
- + Wide entrance/exit areas can be covered by several counters if necessary (3,4,5 counters or more in a row)
- + Software available in several languages
- + Available in a wireless version as well!
